SPOREWET® | READ LABEL CAREFULLY BEFORE USING

HAZARD CLASSIFICATION: 9.1D

Read label carefully and obtain special instructions before use. Do not handle until all safety precautions have been read and understood.

HANDLING PRECAUTIONS

When mixing or applying, wear appropriate protective clothing, gloves and goggles. Flush spray equipment thoroughly with clean water after use.

FIRST AID

If swallowed do NOT induce vomiting. For advice, or if you feel unwell, contact the National Poisons Centre 0800 POISON (0800 764766) or a doctor immediately. If medical advice is needed, have product container or label at hand.

ENVIRONMENTAL PROTECTION

Toxic to aquatic life so do not apply to bodies of water. Do not contaminate sewers, drains, dams, creeks or any other waterways with product or empty container.

DISPOSAL

Ensure unwanted product is used by another operator strictly in accordance with label directions. Do not use empty containers again. After complete drainage, triple rinse containers with water and dispose it into the spray tank. Dispose of packaging at an approved landfill or other approved facility, or if appropriate recycle.

EMERGENCY RESPONSE

In case of spillage wear appropriate protective clothing and prevent material from entering water ways. Absorb spills with inert material and place in waste containers. Sweep up solids without creating dust. Wash area with water and absorb with further inert material. Dispose of waste safely.

PRODUCT INFORMATION

SPOREWET is an alcohol ethoxylate surfactant to be added to spray solutions for the application of Sporeguard fungicide for the prevention of facial eczema. It ensures a better retention of spray droplets to the target plants, better wetting the plant surface, and better spreading of spray droplets. It compensates for the disadvantage of coarse droplets sprays commonly produced by antidrift nozzles.

COMPATIBILITY

SPOREWET is compatible with most commonly used fungicides, insecticides and plant growth regulators. Do not mix **SPOREWET** with other surfactants; or highly acidic or highly alkaline chemicals.

DIRECTIONS FOR USE

SPOREWET will give best results with water rates of 100-200 litres/ha, as higher volumes may result in excessive run-off of spray liquid.

Mixing: Add **SPOREWET** as the last component to the spray tank. Partly fill the tank with water then add the Sporeguard in accordance with the manufacturer's specifications. Under slight agitation now add the **SPOREWET** and fill the tank completely. After addition of the **SPOREWET** to the spray tank, the liquid may turn cloudy but this does not affect the efficacy of the product. Spray the tank mix promptly. **SPOREWET** can be used with all types of spray nozzles.

For 100 litres per hectare of spray mix:

· Mix 300ml Sporeguard plus 100ml **SPOREWET** per 100 litres of water.

For 200 litres per hectare of spray mix:

· Mix 300ml Sporeguard plus 100ml **SPOREWET** per 200 litres of water.

EPA approval number HSR002503. See www.epa.govt.nz for approval conditions.

In transport emergency call 111, Police or Fire Brigade. For 24hr specialist advice in an emergency only call **0800 CHEMICAL (0800 243 622)**. If additional safety information is required, refer to the Safety Data Sheet (SDS). For a copy of the SDS phone 0800 100 123.

STORAGE:

Store in original container, tightly closed and in a locked, dry cool, well ventilated area, away from feed, seeds and foodstuffs. When stored appropriately this product should show no significant degradation for at least two years. **SPOREWET** is not sensitive to freezing. Contact Ravensdown for further information about the use of any product that is older than this.

PHONE **0800 100 123**

 **AGRECOVERY**
www.agrecovery.co.nz

Agrecovery is available on plastic containers up to 60L and for plastic or steel large drums from 61L - 1000L.
