

Compost Testing with ARL – Price List

Compost Analysis Suites

Basic Compost Analysis **\$76.50** (shareholder) **\$90.00** (retail)

pH, moisture, total Nitrogen, Carbon, C/N ratio, Phosphorus, Potassium, Sulphite, Calcium, Magnesium, Sodium, Organic Matter

Used for determining the application rates of composts, manures, soil conditioners, soil additives and soil improvers.

Standard Compost Analysis **\$93.50** (shareholder) **\$110.00** (retail)

Basic Compost Analysis with Iron, Manganese, Copper, Zinc, Boron, Conductivity (Sol. Salts), Organic Matter

Full nutrient analysis for determining application rates of composts and manures. Also provides information where salt levels may be high or if compost is to be applied to salt sensitive plants.

Comprehensive Compost Analysis **\$114.75**(shareholder) **\$135.00** (retail)

Standard Compost Analysis with Nitrate/Nitrite-N and Ammoniacal N

Full nutrient analysis for determining application rates of composts and manures and provides a measure of the maturity of compost. Immature composts may have high ammonium which can have a detrimental effect on plant growth.

Additional Tests

Heavy Metal Analysis **\$93.10**(shareholder) **\$109.50** (retail)

Arsenic, Cadmium, Chromium, Copper, Lead, Mercury, Nickel, Zinc

Can be requested in conjunction with any of the above compost analysis suites.
